

# MEDICAL FITOUTS

ROBYN BOOTH ARCHITECT

# SERVICES

**W**orking with other consultants, I offer a complete fitout service that includes the following steps.

**Feasibility assessment:** Before a suite is bought or leased, I ensure the dimensions and facilities suit your purpose.

**Understanding your brief & vision:** I work with you to ensure we are both clear about your functional and aesthetic requirements, and how your branding or identity is to be incorporated.

**Site inspection & discovery:** Potential challenges are identified upfront.

**Design concept:** I translate your brief into design concepts, including layouts and 3D images, also ensuring compliance with statutory and Australian standards.

**Mood boards & ideas books:** These are to help you select finishes, fittings and furniture.

**Furniture design:** I design bespoke furniture to suit your requirements and taste.

**Approvals & tendering process:** I coordinate with consultants and regulatory authorities, and prepare the documentation to take your project through the approvals and tendering process.

**Contract administration:** I see your project through to completion by administering building works, including weekly site visits for quality control and a final inspection, and following up on any issues during the defects liability period.

A mood board - finding inspiration in nature and human-made objects

Not only highly functional with optimal use of space, but also attractive and calming places for clients and staff.

Reflecting the qualities of you and your profession. Welcoming and comfortable for your clients and staff.

# CLIENTS

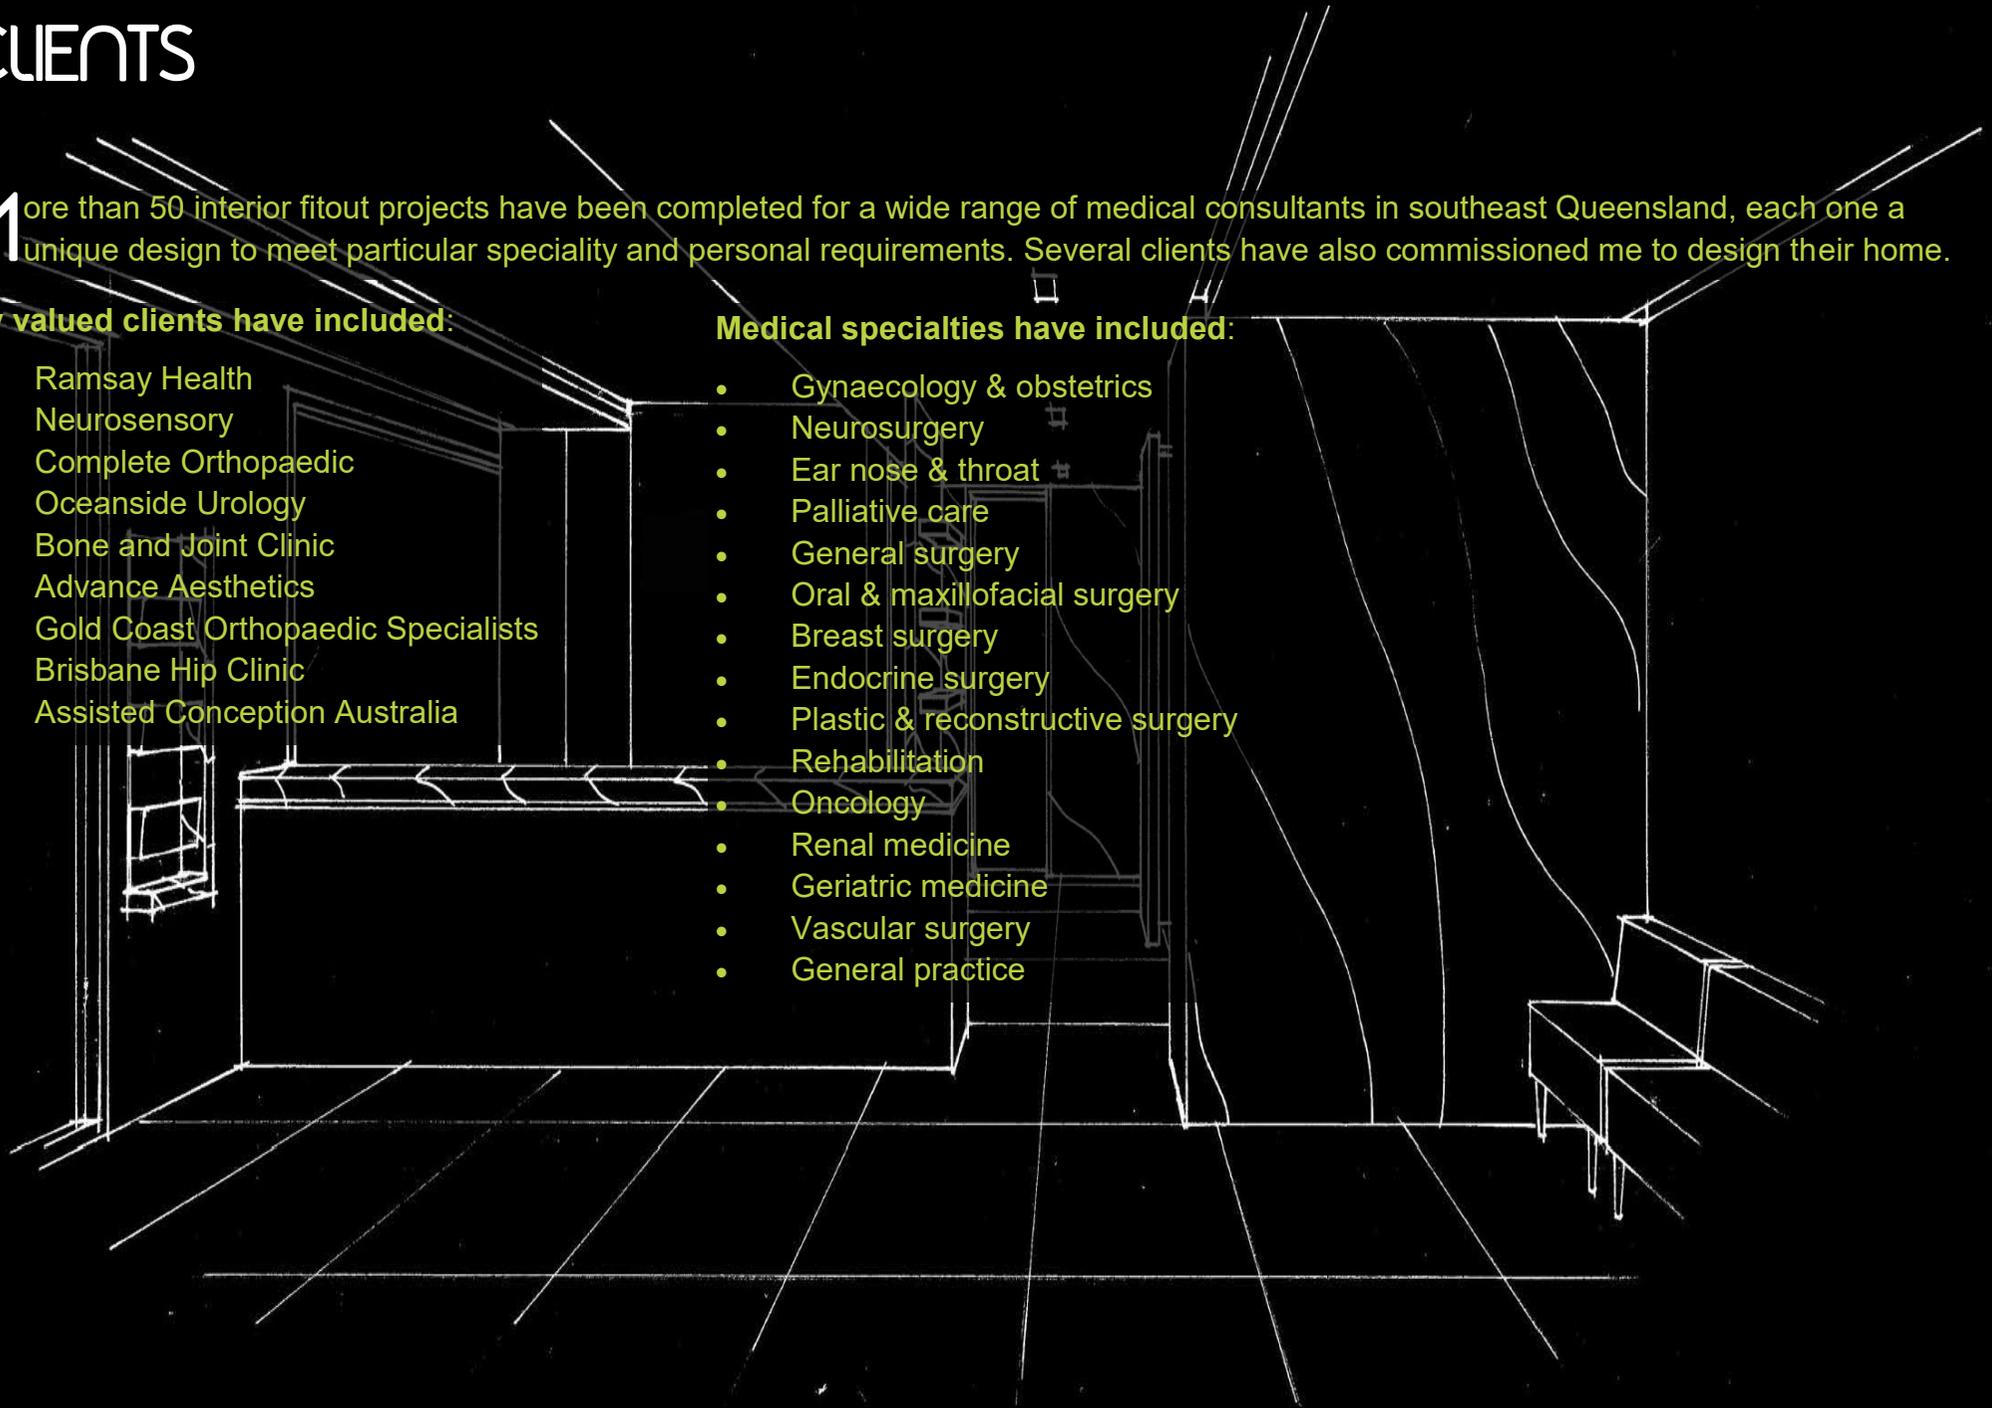

More than 50 interior fitout projects have been completed for a wide range of medical consultants in southeast Queensland, each one a unique design to meet particular speciality and personal requirements. Several clients have also commissioned me to design their home.

- General surgery
- Oral & maxillofacial surgery
- Breast surgery
- Endocrine surgery
- Plastic & reconstructive surgery
- Rehabilitation
- Oncology
- Renal medicine
- Geriatric medicine
- Vascular surgery
- General practice

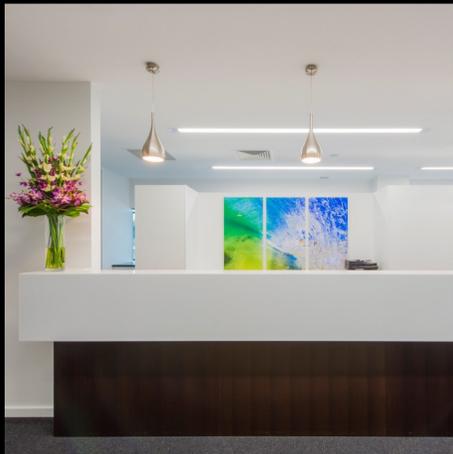

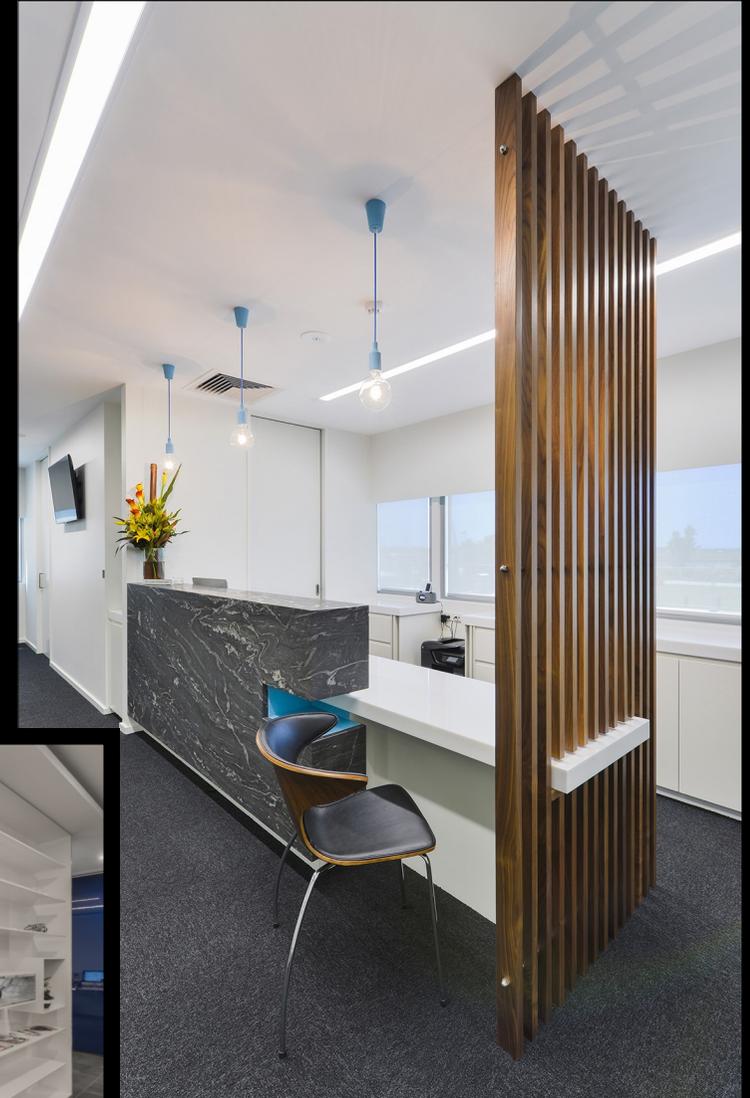

“Robyn assisted me in the design and development of my medical suite and I was extremely happy with the result.

She had ideas about layout that I had not even considered and these improved the flow of the rooms and maximised utilisation of the space.

Robyn assisted in interior design decisions that led to a very professional yet warm environment that I have thoroughly enjoyed working in for the last three years.

“Robyn interacted with the builders and fitout company to ensure that the work was done to an exacting standard and was not backward in making sure they corrected defects and did the fitout in a timely manner.”
